

# PiNa

21<sup>st</sup> June 2022

## When

**21st June 2022**, a day before the ILA exhibition followed by subsequent Get Together event

## Where

Main building, TU Berlin  
Straße des 17. Juni 135  
10623 Berlin

## Theme

The pico and nanosatellite workshop, in short PiNa, is hosted by Universität Würzburg and Technische Universität Berlin every other year since 2007. This year the workshop will take place in Berlin, a day before the biennial exhibition Innovation and Leadership in Aerospace (ILA). The exchange between interested parties from science, industry and the space community within Germany is especially encouraged. In addition to future small satellite missions, the workshop also focuses on in-orbit experiences and training aspects in the field of small satellite development. The lectures come from the following areas:

- Small satellite missions
- In-orbit experiences
- Subsystem technologies & Payloads
- Education & University
- Operations & Regulatory aspects

## Call for Presentations

Applications will be opened in March and available until **22<sup>nd</sup> April 2022**.

One page abstract is required for application. Selected authors will be informed until **20<sup>th</sup> May 2022** and invited for 15 minutes presentations.

## Registration

The registration will be opened in March and available until **27<sup>th</sup> May 2022**.

Details will be published shortly.

## Language

The main language of the workshop is English but contributions in both English and German are accepted.

## Website

Will be available shortly
